Frequently Asked Questions

Why have you started this program?

We started this program to create a simple, asset-backed way for investors to earn steady monthly income without operational effort. By partnering with SharePal, investors help us scale inventory and reach more customers — a true win-win growth model.

Are the monthly rentals fixed or does it depend on the number of times it is rented?

No, the rental amount is fixed when the agreement is initiated. You will continue to receive the agreed rentals irrespective of the number of times it is rented.

How does this program protect my capital and ensure steady returns?

Your capital is secured because all assets are purchased in your name, giving you full ownership. SharePal signs a fixed-payout lease agreement with you, ensuring predictable monthly income, while we handle rentals, maintenance, and operations—minimizing risks and keeping your returns stable.

Frequently Asked Questions

What is the rental agreement about?

The rental agreement defines the fixed monthly payout you receive from SharePal in exchange for leasing your assets to us. It outlines your ownership of the assets, the payout terms, responsibilities for operations and maintenance, and all protections that ensure your returns remain stable and predictable.

What is XIRR?

XIRR (Extended Internal Rate of Return) is a financial metric that calculates the annualized return on an investment when the cash flows happen on irregular dates. It’s more accurate than simple ROI because it considers both amount and timing of each cash flow.

Why does the IRR vary from 20.92% to 52%?

The IRR changes based on whether you invest fully with your own capital or use bank leverage.
With self-funding, your returns come only from the monthly payouts, giving an IRR of around 20.92%.
In the leveraged model, you put in only a portion of the capital while the bank funds the rest. Since the rental income is higher than the EMI you pay, the surplus becomes your profit—dramatically boosting the return on your invested amount.

Frequently Asked Questions

Can I decide what I want to buy?

We'll choose the products — we buy what's in high demand and what best complements our current inventory.

Do I get the products back after the rental period is over?

No — ownership transfers to SharePal at the end of the rental period and, after 12 months of use, products are sold at salvage value. This lets us guarantee fixed payouts, removes resale/admin burden for investors, and keeps inventory fresh.

Who should do this and why?

Anyone looking for a stable, asset-backed passive income stream without day-to-day involvement. It's ideal for investors who want predictable monthly returns while SharePal handles all operations, utilisation, and maintenance.
